Introduction and Summary

This publication represents statistics gathered from two fiscal years, 1999 and 2000, from the public libraries in Mississippi. By law, MISSISSIPPI CODE, 1972, SECTION 39-3 107: "The Mississippi Library Commission shall each year obtain from all public libraries in the state reports showing the conditions, growth, development...with such facts and statistics...as it may deem to be of public interest..." Without the cooperation of public library directors, this publication would not be possible.

The information is presented by year on Operations, Income, Expenditures, Circulation and Other Services. There is also a section on Branch Circulation Comparisons representing three fiscal years.

There are 47 public library systems, comprised of 238 public libraries and 2 bookmobiles, plus two independent public libraries, included in this publication. All 82 counties in Mississippi are served by one or more public libraries.

On page 3, the library systems are listed alphabetically and the counties which they represent. Size codes are determined by populations of public library systems according to the latest U.S. Census data available at the time information is gathered. Therefore, a public library system may move from one size code to another from one year to the next.

Public library statistics are used at the local, regional and state levels to compare library performance, justify budget requests, assist in planning, and provide valuable information for grants and other library programs.

All of the states collect a common core of information according to guidelines established by the Federal State Cooperative System for

Public Library Data (FSCS). The information collected is based on definitions (included in the Annual Reporting Survey at the end of this publication) approved by FSCS. Mississippi has received the Keppel Award from FSCS for timely and accurate data for FY00, 99, 98, 97, 96, 95, and 94.

FSCS also provides state by state rankings for public libraries. According to the latest released data of FY98, Mississippi public libraries do not rank above average in any one category.

The following table compares FY99 and FY2000 data for Mississippi libraries. Income and Expenditures are those that are considered Operational.

| Category | FY99 | FY00 | % Change |
|----------------|--------------|--------------|----------|
| Income | \$33,259,453 | \$35,306,705 | 6%(+) |
| Expenditures | \$30,725,672 | \$33,192,149 | 8%(+) |
| Circulation | 8,651,344 | 8,406,872 | 3%(-) |
| Items Owned | 6,536,391 | 5,974,847 | 9%(-) |
| Library Visits | 6,962,106 | 7,698,243 | 11%(+) |

It is interesting to note that while circulation figures may be dropping some, more and more Mississippians are using their libraries. This increase is due to Internet access offered by the majority of public libraries, extensive library programming, and access to electronic information resources through MAGNOLIA.

Library Codes

| Name of Library System | Counties in System | 1999 Size Code | 2000 Size Code |
|--|--|-------------------|-------------------|
| Benton County Library System | Benton | I | I |
| Blackmur Memorial Library | Water Valley (City) | Independent | Independent |

| Census populations were taken from the Census 2000 data supplied by the Center for Population Studies, University of MS. These population figures do not reflect the library's total service area's population. | | | | | | |
| Note 1 - No census figures were available for these towns or villages. | | | | | | |
| Note 2 - Population is given only for the main branch in these towns. For example: the population for Jackson proper is tagged to the Eudora Welty branch. | | | | | | |
